## Continuation Sheet (PTO-303)

Application No. 10/654,568

Continuation of 3. NOTE:

As a preliminary matter, the examiner encloses an initialled copy of the Information Disclosure Statement of 2 August 2006; the reference at issue, U.S. Patent No. 6,028,653 to Nishida, had previously been considered by the examiner.

Regarding the objection to claims 16 and 29, the examiner understood the language "along a surface" to mean what it said, that the electrodes were along a surface as shown in Fig. 32 of the application rather than in an alternative embodiment shown in Fig. 33 of the application. This was understood to be an amendment which limited the scope of the claim in order to overcome certain prior art. The applicant [see p. 2] now seeks to change the meaning of the claim to "along the surface direction" [see p. 2] without actually amending the claim language. This action by the applicant raises new issues regarding the scope of the claims [under 35 USC 112] and also the rejections under prior art, since the applicant evidently expects the claim scope to be broader in certain respects than the examiner understood.

Using this broader interpretation of the claim language, the applicant argues [see p. 3] that the rejections of claims 29 and 71 under 35 USC 112, first paragraph, are unnecessary because the claimed invention is shown in the figures. Under the broader interpretation the applicant apparently wishes to use, the figures do appear to give support to these claims.

The applicant's response regarding claim 71 and the rejection under 35 USC 112, 2<sup>nd</sup> paragraph would overcome that rejection, in that the response clearly states that the claim requires the electrode to directly contact the liquid crystal, without any intervening layer such as an alignment layer. However, given that this was not the interpretation assumed by the examiner, the claim needs to be further considered under 35 USC 112 and further compared to the prior art.

The applicant's argument [p. 5] regarding the prior art rejection over Nishida and Hirakata is not persuasive. The examiner refers the applicant to the detailed statement of the rejection in the previous office action. Furthermore, if the interpretation sought by the applicant were adopted, it appears initially to the examiner that the claims could be rejected under Nishida in view of Oh alone, without Hirakata, since Hirakata was only relied upon to evidence the feature which the applicant now seeks to disavow.
